INNOMEDIA'S IP VIDEOPHONE GARNERS "BEST OF SHOW" AWARD

***TMC Editorial Staff Honors World's First All-in-one IP-based Desktop VideoPhone
at INTERNET TELEPHONY CONFERENCE & EXPO 2001***

San Jose, CA – February 26, 2001 — InnoMedia™, a leading supplier of Internet telephony appliances, business solutions and services, announced today that its IP VideoPhone was recognized as "Best of Show" at the INTERNET TELEPHONY Conference & EXPO 2001™. Conference organizers have posted award winners on the Technology Marketing Corporation (TMC)™ Web site and will also publish the complete results in the April issue of *Internet Telephony*®.

"TMC's 'Best of Show' awards honor products and services that are shaping the convergence of voice, video and data, and leading the Internet telephony industry into the future. InnoMedia's visionary thinking and excellence in engineering are exemplified by the IP VideoPhone, a product that is on the cutting edge of technology," said Rich Tehrani, TMC president and conference co-chairman of INTERNET TELEPHONY Conference & EXPO. "InnoMedia's IP VideoPhone brings the richness of voice with video to the market, adding a whole new dimension to communications."

"InnoMedia is honored to be recognized by our peers and the TMC editorial staff at INTERNET TELEPHONY Conference & EXPO", said Robert Selzler, vice president of marketing for InnoMedia. "The award re-confirms the pioneering features of the InnoMedia IP VideoPhone -- it utilizes packetized voice and video in a revolutionary way to offer colorful, information rich communications. Now, for the first time, colleagues in different cities and countries can do business 'face-to-face' from the convenience of their desktop reducing their travel time and expenses."

Space age in style, the videophone takes the complexity out of person-to-person videoconferencing. The product simply plugs into a quality of service broadband network (no PC required), allowing users to immediately pick up the phone and dial. This plug-and-play system is

convenient, cost-effective and a high-quality solution for companies with multi-national offices that would like their busy executives to benefit from daily face-to-face communication.

InnoMedia's IP VideoPhone boasts a 4" TFT color LCD display and a high-quality CCD camera. It is interoperable with other standards-based videoconferencing systems that support H.323 (G.723 and G.711 codecs), the industry standard for IP multimedia communication. Ideal for the corporate customer, the InnoMedia IP VideoPhone is equipped with advanced features for conferencing such as speakerphone, voice mute, phone book and last number redial.

InnoMedia's IP VideoPhone is currently available as the "DAVNET IP VideoPhone." InnoMedia partnered with Davnet Limited, the international Internet Protocol (IP) based tele-communications carrier, in November of 2000 to create and deliver the DAVNET IP VideoPhone. The DAVNET IP VideoPhone is available through the Davnet global corporate client network priced at US\$1500 per unit.
