**Broadline Communications Chooses InnoMedia for its VoIP Service**

**InnoMedia's MTA 3328 selected for its flexibility, robustness and ease of use**

MILPITAS, CA – (March 23, 2004) InnoMedia Inc. and Broadline Communications, today announced a partnership to deliver a new and exciting VoIP service over a multi-vendor platform. This VoIP platform combines InnoMedia's MTA 3328 voice terminal with Nuera Communications RDT-8g VoIP access gateway and Jasomi's PeerPoint network boundary traversal solution.

"Innomedia worked wonderfully with us and our other business partners to enable access to our VoIP services," said Matt Blocha, Broadline's President. "Both InnoMedia and their MTA 3328 showed tremendous flexibility and performed consistently well. This contributed greatly to getting our service up and running on time and without problems."

Deployed around the world, InnoMedia MTA devices are the voice terminals of choice for leading service providers. InnoMedia's family of MTA products include single and multi-port devices with NAT router capabilities for voice and video, and support both MGCP and SIP.

InnoMedia MTA devices are used by Broadline™ customers to connect to any existing broadband Internet connection to deliver fully featured and cost-effective alternative voice service. By using a broadband connection for both your Internet and voice needs, you're able to take full advantage of the bandwidth you're already paying for.

**About Broadline Communications**

Headquartered in Orlando, Broadline™ Communications combines the innovation of new technology and the power of a large competitive local exchange carrier to offer an exciting new VoIP phone service. Broadline™ is a subsidiary of FDN Communications. With Broadline™, you can connect up to five phones in your home and make all the calls you want – local and long-distance – for a flat rate. The company's website is at [www.mybroadline.com](http://www.mybroadline.com).

**About FDN Communications**

Headquartered in Orlando, FDN has steadily expanded its service territory from Jacksonville to Miami to Tampa Bay to Atlanta over the past three years, and now has more than 190,000 business telephone lines in service. FDN offers a complete line of communications services, including: local and long distance voice, Internet access, Virtual Private Networking (VPN), Web Hosting and Integrated voice and data (DSL) services to businesses throughout Florida and central Georgia. The company's website is at [www.fdn.com](http://www.fdn.com).

**About InnoMedia**

Founded in 1995, InnoMedia is a privately held multinational organization with operations in the United States, Singapore, Taiwan and China. The company delivers Internet and broadband access IP telephony solutions to broadband service providers, as well as OEM and distribution partners. InnoMedia has the most advanced, award winning portfolio of IP telephony solutions available in the market today, delivering high-quality voice and video over any IP network.
