INNOMEDIA SELECTED BY NET2PHONE FOR SIP BROADBAND VOIP

MILPITAS, CA (July 7, 2004) – InnoMedia, Inc. today announced that Net2Phone, one of the world's premier VoIP service providers, has chosen InnoMedia as an end-user device provider for its VoiceLineSM broadband telephony service. Net2Phone VoiceLine customers worldwide will be able to use InnoMedia's MTA 3328 to connect to this service.

Net2Phone VoiceLine service provides digital telephone service to both small business and residential broadband users providing cost savings on both inbound and outbound calling globally. Net2Phone markets this service primarily to broadband service providers, empowering them with VoIP solutions they can bundle alongside other broadband offerings.

Subscribers can use the InnoMedia MTA 3328-2 two port VoIP telephone adapter to access Net2Phone's VoiceLine service. Compatible with any standard analog telephone set, InnoMedia's MTA 3300 Series can support multiple telephone jacks, each with their own unique telephone number and improves voice quality by utilizing advanced compression, echo cancellation, and packet recovery algorithms.

"InnoMedia worked closely with us to customize products that met all performance criteria for our VoiceLine service", said David Lando, Chief Operating Officer, Net2Phone Global Services. "We are delighted with the robustness and quality of InnoMedia MTAs and the professionalism of the InnoMedia organization", added Dr. Lando.

Nan-Sheng Lin, President of InnoMedia said, "We are pleased to be partnering with Net2Phone, the World's most recognized VoIP company, and being a part of their innovative VoiceLine service offerings. Net2Phone customers get a feature rich, low cost calling service, and we get to demonstrate that InnoMedia products are once again the equipment of choice for the world's leading service providers."

About InnoMedia

Founded in 1995, InnoMedia is a privately held multinational organization with operations in the United States, Singapore, Taiwan and China. The company delivers Internet and broadband access IP telephony solutions to broadband service providers, as well as OEM and distribution partners. InnoMedia has the most advanced, award winning portfolio of IP telephony solutions available in the market today, delivering high-quality voice and video over any IP network.

InnoMedia VoIP telephone gateways and adapters are widely deployed in the United States, Japan and other parts of the world by leading service providers. InnoMedia's MTA 3300 Series is the most interoperable IP telephony CPE device available today. They can be used in a multitude of system configurations including broadband loop emulations with GR303/V5.2 gateways, PacketCable™-based Call Agents/Softswitches, or SIP-based Softswitches.
