FOR IMMEDIATE RELEASE

POINTONE SELECTS INNOMEDIA VOIP PRODUCTS FOR ITS STARPOINT™ DIGITAL PHONE SERVICE

MILPITAS, CA (September 13, 2005) – InnoMedia Inc. today announced that PointOne, with the largest VoIP network in North America, has chosen InnoMedia end user devices for its StarPoint IP™ broadband telephony service, which enables subscribers to use digital phone service over PointOne's 100% IP network using standard telephones and fax machines.

"Innomedia brings an innovative set of products for use with our digital phone service," said Sam Shiffman, EVP of PointOne. "The partnership means quality and value for our customers that cannot easily be found in the industry. And they field a team of professionals to support the products that are among the industries best of class, we are excited about the developing potential for our two companies."

InnoMedia's reputation and strong line up of products prompted PointOne to select InnoMedia MTA telephone adapters. InnoMedia boasts an impressive list of network operators around the world employing its voice and video products, to offer service to both the consumer and enterprise markets. With every MTA model, InnoMedia has incorporated its award winning, patented technologies to deliver the most advanced capabilities, and quality of service and call features that subscribers and their service providers seek.

InnoMedia MTA telephone adapters work with softswitches and session border controllers from leading manufacturers, and other SIP and MGCP based platforms. Compatible with any standard analog telephone set, InnoMedia's MTA products offer multiple auto-provisioning schemes, are simple to install, provide advanced QoS and rate limiting schemes for superior voice service, and support T.38 and auto-G.711 fallback for reliable fax transmission. InnoMedia MTAs are the best price to performance IP telephony CPE devices available on the market today.

To meet PointOne's dedication to unparalleled reliability and performance, InnoMedia spent months working with PointOne to ensure all MTAs met their standards. InnoMedia verified interoperability with PointOne's network technologies and support for the full suite of StarPoint IP™ features including device based 3-way calling, caller ID, and call transfer. By selecting InnoMedia MTAs, PointOne continues its tradition of having an all next generation network to deliver the highest quality service.

Dr. Nan-Sheng Lin, president of InnoMedia, said: "Our success with the world's leading service providers is built on our reputation for delivering products on schedule and our total commitment to service and quality. We're honored to be affiliated with PointOne, which is well recognized in the industry as a leader in VoIP."
